

# ABOUT IPR

Intellect or "Buddhi/Dhi" has been defined and understood differently. Although the brain is the physical seat of all thoughts, the mind is the source of all creativity. "Boudhik Sampada" or Intellectual Property (IP) is the collective term that includes a diverse types of creations of the mind - "inventions, literary and artistic works, designs, symbols, names and images" and others. The public disclosure and commercial use of these creations enables others to build on the knowledge embodied in the intellectual property of another. The creator of the inventions is motivated to grant exclusive rights, for economic advantage. Over the years of human innovation, a well-functioning legal system - 'Intellectual Property Rights' has emerged that is enforceable through and regulated by the governments. It is a watershed domain pooling knowledge from various disciplines to create value.
